

## Javascript :what is XML HTTP request ?&scope Day3 task.

```
let xhr = new XMLHttpRequest();
console.log(xhr);
xhr.open("GET", "https://restcountries.com/v3.1/all");
xhr.send();
xhr.onload = function () {
  const data = JSON.parse(xhr.response);
  console.log(data);
  console.log(xhr.status);
  for (let i = 0; i < data.length; i++) {
    console.log(`
countryName:${[data[i].name.common]}
contryFlags:${[data[i].flag]}
Region:${[data[i].Region]}
Sub-Region:${[data[i].SubRegion]}
Population:${[data[i].population]}
`);
  }
}
let obj1=
{name:
  "ravi",
  age:23,
};
let obj2={
  name:
  "deva",
  age:23};
console.log(JSON.stringify(obj1) === JSON.stringify(obj2));
```
